

Wanted: Civil Design Engineer

We are chasing a Civil Design Engineer 6+ yrs experience who is looking for a challenge, and ready to take the next step in their career.

The role is hands-on as a Senior/Project Engineer, contributing to the management of our growing civil team and client base. Civil consultancy provided by BE Collective includes stormwater, roads & drainage, traffic, and flood analysis. RPEQ highly preferred.

The right person has some residential and commercial experience under their belt, impressive technical and small team management skills, and is keen for a discipline head or associate's position, potentially with profit share incentives down the track.

We have a range of projects on the go including subdivisions, and town house developments, civil projects, etc, with 20% of our annual work comprising international projects.

The incumbent would need to be proficient (or up-skill quickly) to contribute across the civil sub-disciplines, and show an interest in supporting a multi-discipline approach (structural, building services, ESD, & project management).

Salary package would be highly competitive, dependent on capability, experience, and drive. Special conditions include additional paid leave between Christmas and New Year to promote work/life balance.

Please get in touch with [Chandler](mailto:chandlert@becollective.net) (chandlert@becollective.net), with your resume and a cover letter – or duck in anytime for a coffee. Help us get the word out!

About Us

BE Collective is a growing, award-winning, multi-discipline project management & design consultancy.

Our team is comprised of diligent passionate consultants who utilise their professional expertise to facilitate optimal Client outcomes. BE Collective maintains a rigorous approach to Continual Professional Development (CPD). In addition to the commitment required by the relevant institutes and councils, CPD targets are mandated as part each staff member's employment contract.

We challenge mediocrity and strive towards Client relationships and project team associations where a collective approach is championed in recognition of enhanced outcomes.
